

## **Problem Set 2**

**All parts are due March 3rd, 2016 at 11:59PM.**

---

**Name:** Emmanuel Akinbo

**Collaborators:** Name1, Name2

---

### **Part A**

#### **Problem 2-1.**

- (a)
- (b)
- (c)
- (d)
- (e)

#### **Problem 2-2.**

- (a)
- (b)
- (c)
- (d)

#### **Problem 2-3.**

- (a)
- (b)
- (c)
- (d)

## Part B

### Problem 2-4.

*Submit your implemented python script.*

- (a) Submitted
- (b) Submitted
- (c) Create a dictionary where the keys are the names of the students. The values for each student would then be a tuple of the form:

*(Sum of grades, Sum of credits)*

The tuple then can be used for `Update_Grade(self,s,c,g)` and `Average(self,s)`

- (d)
- (e) Submitted
